- **Labor NY Job Zone**- an interactive resource to help adults manage their careers. Job Zone is a tool use to help organize your job search, exploring your career interests and skills, developing customized resumes and exploring more than 800 careers. Jobseekers can also take a survey to determine how employable there are and how to increase their chance of landing a job. The site uses SMART (Skills matching and referral Technology) which uses artificial intelligence software specifically designed to analyze the whole person including a person's resume for skills, work experience, and talents. The software system asks, "What skills does this person have" and "What career have others with these skills followed?" The system then recommends job matches based on the probability that the individual will follow a similar career path based on work history, experience and skills.
